

# DESY PHOTON SCIENCE USERS' MEETING 2022.

21–28 January 2022

European XFEL Users' Meeting 2022  
21–27 January 2022

We would like to invite our users and collaborators to attend the DESY Photon Science Users' Meeting 2022. Moreover we are looking forward to welcoming interested scientists from many different disciplines to our virtual event for discussions of the current and future research at the DESY light sources and the planned upgrades:

- **PETRA III.**
- **FLASH.**

This unique combination of light sources in the Hamburg region is complemented by the European XFEL.

Topics to be covered at the Users' Meeting include PETRA III and FLASH research highlights, a joint session on soft X-ray FEL applications and several workshops on different research or beamline related topic, news from the photon science activities, as well as reports from User Committees.

Poster sessions will take place during the week.

Registration is required, especially for poster contributions, until **17 January 2022**

Further information (registration, programme etc.) is available online:
