

**The following rules apply in addition to general DESY-wide rules\*.**

- 1) External users have to provide a **negative PCR test result** and present it at the DESY Photon Science User Office before proceeding to the beamline. For details please consult [https://photon-science.desy.de/users\\_area/index\\_eng.html](https://photon-science.desy.de/users_area/index_eng.html)
- 2) The User Office will confirm the testing on the routing slip which has to be carried with you throughout your stay at DESY.
- 3) Maintain a safe distance of 2 m and minimize contact with other persons wherever possible.
- 4) Please reduce the number of persons working together in a hutch/lab in order to allow safe distance. It is recommended to split up in well defined shift teams which – wherever possible – should not mix.
- 5) **Masks (medical masks or FFP2 masks) are highly recommended** in the experimental halls including the **experimental/control hutches and labs**. Masks are also highly recommended in any other public space in Campus buildings. When sharing a lab/hutch/room with others **we strongly recommend to use FFP2 masks whenever possible**, which is for your own and the staff's safety.
- 6) External users have to provide their own masks.
- 7) Contact service groups/local contacts/contractors/users etc. before you start working and coordinate the joint work in order to reduce contact times.
- 8) Please, perform a **self test** every second day of your stay at DESY and as soon as you observe any symptoms indicative of Corona. In case of a positive result please inform the User Office and the Hostel. Consult our information sheet and act accordingly.

**I hereby acknowledge that I have completely read and fully understand the PETRA III and FLASH Corona Rules**
